

SUMIT AVHALE

Software Engineer

Aurangabad, Maharashtra • +91 8788395470 • sumitavhale99@gmail.com • [GitHub](#) • [LinkedIn](#)

SUMMARY

Computer Engineering graduate (2025) with solid programming skills in Java, Python, and JavaScript, and a strong foundation in Object-Oriented Programming, Data Structures & Algorithms, and Database Management Systems. Hands-on experience designing and building full-stack, transaction-based applications using React.js, Node.js/Express.js, Spring Boot, and both RDBMS (MySQL, PostgreSQL) and NoSQL (MongoDB) technologies. Comfortable working in Agile/Scrum teams, writing unit tests, participating in code reviews, and communicating clearly with cross-functional stakeholders. Enthusiastic, eager to learn, and motivated to grow as a software engineer.

RELEVANT STRENGTHS

- Object-Oriented Design & Patterns: Applied OOP principles and MVC/layered architecture across full-stack projects for maintainable code.
- Database Design: Designed relational schemas and queries in MySQL/PostgreSQL (via JPA/Hibernate) and document-based data models in MongoDB.
- Web & Application Development: Built REST APIs and UIs with React.js, Node.js/Express.js, and Spring Boot across multiple end-to-end projects.
- Agile Collaboration: Worked in Agile/Scrum sprint cycles, collaborating with cross-functional team members and communicating clearly in team settings.

TECHNICAL SKILLS

- Languages: Java, Python, JavaScript, SQL, C, C++
- Object-Oriented & Design: OOP, Design Patterns, MVC/Layered Architecture, Data Structures & Algorithms
- Databases: RDBMS (MySQL, PostgreSQL) and NoSQL (MongoDB); JPA/Hibernate
- Frameworks: React.js, Node.js, Express.js, Spring, Spring Boot, Spring MVC, J2EE
- Web & APIs: REST API development, HTML, CSS, JavaScript
- Practices: Agile/Scrum, SDLC, Unit Testing, Code Reviews, Git/GitHub version control

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern — Adzevia AI

Mar 2026 – Jun 2026

Remote

- Developed and supported REST APIs and backend services for SaaS applications, writing and debugging moderately complex features.
- Used Git/GitHub for version control and followed Agile sprint cycles and team development practices.
- Collaborated with cross-functional team members in Agile sprints, communicating technical progress clearly.

PROJECTS

Employee Leave Management System [link](#)

- Engineered a full-stack leave management system with Spring Boot, Spring Security, Hibernate, and PostgreSQL, applying OOP principles and layered architecture for scalable, reusable services.
- Developed 20+ REST APIs for employee management, leave applications, and approval workflows; implemented Role-Based Access Control (RBAC) and added exception handling, validation, and Swagger documentation.

VideoTube — Full Stack Video Streaming Platform [link](#)

- Built a full-stack video-sharing platform with JWT-based authentication, uploads, playlists, and dashboards; designed REST APIs and optimized database queries.
- Optimized backend workflows and database queries to improve throughput and reduce latency under load.

Carrot E-Commerce Platform [link](#)

- Designed a modular MVC backend and built responsive React.js interfaces; developed RESTful Node.js/Express.js APIs and integrated MongoDB for product, user, and order data.
- Built RESTful APIs to handle core business logic across product, user, and order operations.

EDUCATION

B.Tech. in Computer Engineering — Government College of Engineering, Jalgaon

Dec 2021 – Jun 2025

CERTIFICATIONS & ACHIEVEMENTS

- Web Development Bootcamp (2024)
- Data Science – AcmeGrade (2022)
